# 3<sup>rd</sup> World Confocal Congress of the International Confocal Group

June, 1-3, 2023  
Barcelona, Spain

We are planning a hybrid format with an **on-site** and **virtual congress**.

It is impossible to fully replicate the richness, chance encounters, and energizing atmosphere of a face-to-face gathering, but a virtual congress will allow participation and interaction during the sessions for those who will not be able to travel to Barcelona.

We will experience two congresses in one, for dermatopathologists and dermatologists we offer **multiple imaging technologies**, such as in vivo confocal microscopy and **ex vivo confocal microscopy program**. The later is also open for pathologists and other medical specialties and researchers.

We look forward meeting all of you!
